

Making the Box

1. Use 2 pieces of origami paper to fold the box and lid.

2. Cut a slit along the bottom of one of the back edges for the wires.

3. Cut a strip of paper. Fold back the tabs and glue them down to the inside of the box lid.

4. Glue the box tabs and back onto the box.
5. Tape the servo to the inside of the back of the box. Pass the arm (paperclip) through the paper loop. Use the box opening and closing sketch to find the best combination of open and close values and arm placement.
